### BCGold Corp. – Big Exploration Company Talent With A Small Company Approach

**Mining & Exploration  
Precious Metals  
(TSX-V :BCG)**

**BCGold Corp.**

**Suite 1400, 625 Howe Street  
Vancouver BC Canada V6C 2T6  
Phone: 604-646-1589**

**Brian P. Fowler, P. Geo.  
President, CEO and Director**

#### **BIO:**

**Brian P. Fowler, P. Geo. President, Chief Executive Officer, Director**

Mr. Fowler is a founding director of BCGold Corp. and in January 2007 was appointed to President and CEO. Mr. Fowler is also Director and Vice President Corporate Development for Oro Silver Resources Ltd., an advisor to Oro Gold Resources Ltd. and Chairman and

founding director of Laurentian Goldfields Ltd. So far, in 2007 Mr. Fowler has completed financings totalling more than \$7 million in non-brokered private placements for BCGold and Laurentian Goldfields Ltd. Mr. Fowler has over 27 years experience as an explorationist, working for junior, mid-tier and major mining companies on a global basis. Prior to becoming an officer of BCGold Corp, Mr. Fowler was a Mining Consultant with Quest Capital Corp.'s management group. In this role Mr. Fowler identified and evaluated exploration and mining investment opportunities for Quest Capital Corp. and associated companies. During the period May 2004 to November 2005, Mr. Fowler was Exploration Manager for Quadra Mining Ltd., where he oversaw advanced and pre-feasibility exploration projects in Chile and Peru. Prior to this, Mr. Fowler worked in a variety of technical and exploration managerial roles for Placer Dome Inc. based out of Kamloops and Vancouver, B.C. for a period of 13 years. Mr. Fowler holds a B.Sc. (Special) in Geology (1981) from the University of Alberta.

#### **Company Profile:**

BCGold Corp. (TSX-V: BCG) is a Vancouver-based junior resource company focused on base and precious metal exploration in under-explored historic mining and exploration districts in British Columbia and Yukon. BCGold acquires and advances conceptual, early and mid-stage, quality exploration opportunities towards resource development utilizing internal expertise and by engaging preferred joint venture partners.

**Interview conducted by:  
Lynn Fosse, Senior Editor**

**CEOCFO:** Mr. Fowler, what is your vision for BCGold?

**Mr. Fowler:** "BCGold is a hybrid exploration company focused on growth through discovery and mineral resource development. By hybrid, I mean that we strive to achieve our growth strategy through both conceptual, generative exploration as well as by acquiring and advancing more developed, quality early resource stage exploration opportunities. My vision for BCGold is to make at least 2 significant exploration discoveries in 2007 with excellent resource growth potential. The objective is to develop and expand this resource base through continued exploration and joint venture with suitable partners."

**CEOCFO:** What is the common thread for your properties?

**Mr. Fowler:** "The common thread is that they are all situated in BC and Yukon, they all have a gold component and, in my opinion are all excellent exploration opportunities."

**CEOCFO:** Why do you like the particular projects you have?

**Mr. Fowler:** "I could go on for quite some time answering this question. My exploration roots are in B.C. and the Yukon. I have worked here for years as a consultant, for various junior companies and for Placer Dome. In that time I have come to see that this part of the world remains under-explored, offers huge resource potential and hosts the "company maker" types of mineral deposits that appeal to me. The porphyry copper-gold deposits, high-grade gold veins, volcanogenic massive sulphides (VMS), shear and replacement base metal deposits – BC and Yukon has them all. And so does BCGold's property portfolio!"

"I would say that our Engineer Mine Property personifies what BCGold is all

about. Engineer is an historic, high-grade gold mine that was once a significant mining concern in B.C. Mining got way ahead of exploration and development and it was all but over by 1930. No one took the time to fully explore and understand the system. The exploration potential for additional high and low-grade gold mineralization is excellent and that is what BCGold is focused on doing. BCGold has an option to earn 100% interest in Engineer Mine. The fact that we have a small high grade resource and the means to mine and process it on site is merely an added bonus.”

The Carmacks Copper-Gold Properties are situated around the newly commissioned Minto Mine and the “soon-to-be developed” Carmacks Copper mine, owned by Sherwood Copper Corp and Western Copper Corporation respectively. BCGold has the option to earn 100% interest in 17 mineral properties (16,274 hectares) that were identified and staked over areas with geological, geochemical and geophysical characteristics similar to Minto and Carmacks. What better place to explore than near two mines?”

“The Toodogone area first intrigued me when I worked for Placer Dome and looked after generative exploration in Western Canada. I identified the Toodogone district as an area that could host Placer sized copper/gold deposits and shortly after I left Placer Dome, the company acquired several properties there from Stealth Minerals. Through a round-about fashion, I managed to acquire the three I especially liked for BCGold. These are the Sickie-Sofia, Fogmess and Louis. All have been explored for high-grade epithermal gold in the past but I think they are better candidates for economic porphyry copper-gold deposits, similar to the nearby South Kemess Mine.”

“The Voigtberg Property was BCGold’s qualifying transaction. It is a porphyry intrusion-related gold system in the Galore Creek camp, just 5 kilometres off the

Galore Creek road. BCGold conducted a drill program there last year and we intersected 51.15 meters averaging 1.03 grams per ton gold. Not bad for our first ever diamond drill program. We were quite pleased with that and have since completed another exploration program and drilled another 4 holes in 2007. Assays are pending.”

“Lastly, BCGold’s generative efforts has generated a number of quality, 100% owned mineral properties strategically situated in the Mt. Milligan, Revelstoke, Siwash and Samatosum districts. Again, this is in-synch with our exploration focus on historic mining districts. The Company is actively seeking joint venture partners to advance these properties.”

**“We come from an exploration culture predicated on passion, dedication, excellence and hard work. BCGold has fostered this culture. We are a very tight, well-knit group. At Placer Dome, our leaders were explorationists who exemplified passion, excellence and integrity. Placer is gone now, but we still carry the torch “so-to-speak”. Anyone who knew us then wouldn’t expect anything different from us now. We look at win-win relationships in all that we do. That is just how we do things.”**

**- Brian P. Fowler, P.Geo.**

**CEOCFO:** What is at the heart of BCGold; what is the passion and integrity you refer to on your website?

**Mr. Fowler:** “I guess anyone who knows me and my BCGold colleagues knows that we are very deliberate and passionate about mineral exploration and geology. I have worked with a two of BCGold’s co-directors for fourteen years on a global basis at Placer Dome and one director at Quadra Mining for nearly 2 years. We come from an exploration culture predicated on passion, dedication, excellence and hard work. BCGold has fostered this culture. We are a very tight, well-knit group. At Placer Dome, our leaders were explorationists who exemplified passion, excellence and integrity. Placer is gone now, but we still carry the torch “so-to-speak”. Anyone who knew us then wouldn’t expect anything different from us now. We look at win-win relationships

in all that we do. That is just how we do things.”

**CEOCFO:** What is the financial picture of the company?

**Mr. Fowler:** “As of mid-September, the Company had 17.4M shares issued and working capital of \$3.4M. We conducted 3 diamond drill programs in 2007 and will probably spend on the order of \$4M in exploration. We are healthy and we are “discovery driven”.

**CEOCFO:** What is the timetable?

**Mr. Fowler:** “BCGold is just over one year old and in that short period of time we have conducted four drill programs and made two significant discoveries. As I mentioned, this summer we successfully undertook three drill programs and are just completing the final drill program in the Toodogone. Assays for this years work are still pending. We are confident that at least one of these programs will result in a significant new discovery and provide basis for additional work and resource development next year.

We have a large land package in the Yukon and BC. We are grooming several quality properties and I am confident that by early to mid next year, we will have farmed out a number of them to quality joint venture partners.

We are currently compiling this year’s and all the historic Engineer Mine data we can get our hands on with the intention to hit Engineer Mine hard next year. We will be dewatering the bottom three levels to map, sample and test-mine the Engineer and Double Decker Veins. We have excellent indications a mineable, non-compliant mineral resource of up to 20 thousand ounces gold grading better than 1 ounce per ton gold is readily available between 5 and 8 levels. We have a 20-man trailer camp and an operational 25-ton per day mill on site.

We have had successful programs on all our projects this summer. Assays are still pending but I am confident results will warrant a similar, \$4M exploration budget for next year.

I reiterate BCGold's strategy. The best place to find a mineral deposit is near one that has been, is being or is about to be mined. BCGold has quality exploration properties in the Toodoggone, Minto, Carmacks, Galore Creek, Engineer, Mt. Milligan, Samatosum, Revelstoke and Siwash Camps. BCGold is discovery driven. We have the management and technical team required for discovery and growth."

**CEO CFO:** Why should potential investors choose BC Gold out of the crowd?

**Mr. Fowler:** "For the reasons cited already. BCGold has a solid management group that knows the mining and exploration business. We have big company experience and small company agility. We are entrepreneurial, we can move quickly and we have a very broad contact base in the mineral resource and finance sector. Last March BCGold raised just

over \$4.2 million in a hard-dollar, non-brokered private placement. We have access to capital and exploration opportunities. People believe in us and we have a quality portfolio. In addition to our exploration activities in British Columbia and Yukon, BCGold is also looking at the merits of developing a generative effort in South America in early 2008."
