

Leading Hemp Company Folium Biosciences Launches All-Natural CBD Infused Gummies

Colorado Springs, CO, April 17, 2019 – Folium Biosciences proudly unveils its advanced, all-natural and gluten-free CBD infused fruit gummy. As the most sought after CBD food item, this high-demand, 0.0% THC, Phytocannabinoid-Rich (PCR) Broad Spectrum Hemp Oil product gives the Folium customer another opportunity to expand their CBD line with an additional, specially formulated, ready-to-market product.

“CBD infused gummies have long been requested by customers because most gummy brands available today use isolate, artificial coloring, preservatives and chemicals. Some even contain titanium dioxide, an ingredient found in sunscreen,” said Shan. *“We knew the market needed an all-natural, quality solution so we launched only once our team of scientists were completely satisfied that our proprietary formulation delivered on quality, consistency and flavor profile. With mass consumer CBD demand exploding, our exponentially scaleable solution is both timely and crucial for any major retailer entering this space.”*

With a production capacity of over one million gummies daily, Folium Biosciences is already manufacturing private label gummies for big box brands who insightfully engaged in early discussions with the company.

Laboratory tested for safety, purity and potency, Folium Biosciences meets all industry food compliance standards. As the only hemp company issued a Certificate of Free Sale and a Manufactured Food Establishment License by the Colorado Department of Public Health & Environment (CDPHE), Folium claims its rightful place as the premier hemp company for manufacturing, processing and fulfilling of phytocannabinoid-rich CBD oil, water-soluble technologies, and finished food products.

In addition to launching CBD infused gummies, Folium Biosciences is expanding its line of Cosmeceutical and Active Lifestyle products this season. A CBD relief moisturizer, CBD infused hand and foot masks, CBD heating and cooling gels, CBD face moisturizing pearls, a CBD hydra-renewal face mist, CBD face serum, and CBD infused relief wraps will be available this month.

“We have designed total category management solutions for major retail partners, offering complete lines of innovative, first-to-market products. This is a first for the hemp space and we’re fully positioned to meet mainstream market demands through control of our supply chain and the ability to commercially scale,” Shan continued.
