Stilwell Memorial Hospital Selects Stockell Healthcare's InsightCS® Revenue Cycle Information System

St. Louis, Missouri – February 26, 2013. Stockell Healthcare Systems is pleased to announce that Stilwell Memorial Hospital, a full-service healthcare center located in Stilwell, Oklahoma, has selected the company's InsightCS® Revenue Cycle Information system featuring complete Patient Access, Patient Accounting and Billing, Integrated Claims Management, and Business Intelligence/Reporting.

Alan L. Adams, Hospital President & CEO stated "The hospital is looking forward to implementing Stockell's InsightCS system which will work hand-in-hand with our recently implemented electronic medical records system. We were looking for a product which would help us streamline our account management practices and be able to keep pace with us as we continue to grow. We think InsightCS® will help us do just that."

Stilwell also recently went live with Medsphere's OpenVista electronic health record, a comprehensive suite of clinical support applications that enables improved patient care and more efficient clinician workflow. As they have previously in other customer hospitals, Stockell Healthcare Systems and Medsphere will collaborate to streamline data exchange between InsightCS® and OpenVista to create a fully interoperable enterprise health IT platform.

Rick Stockell, President of Stockell Healthcare added, "Community Hospitals are on the front line delivering patient care within our local communities. They represent an important market segment for us and we are pleased with the opportunity to provide our full suite of advanced Patient Access and Patient Accounting solutions to help Stilwell Memorial improve patient and provider satisfaction, and to maximize operational efficiency throughout the entire revenue cycle."

About Stilwell Memorial Hospital

Stilwell Memorial Hospital, a full-service healthcare center licensed for 34 acute care beds, 10 geriatric psychiatric beds and 7 bassinets, has had a tradition of quality care since 1977. Stilwell offers a full range of healthcare services, including general and family practice, internal medicine, urology, psychiatry, OB/GYN, ENT, orthopedics and general surgery.

The hospital also offers emergency room, MRI and other radiology services, respiratory care, home health, orthopedic surgery and procedures, and physical therapy. An outstanding hospital auxiliary contributes greatly to Stilwell's success, as does a physician's clinic added in 1998 and enlarged in 2007. A recently added geriatric psychiatric unit creates a wide variety of options appropriate for a progressive rural facility.

About Stockell Healthcare Systems, Inc.

Founded in 1987, Stockell Healthcare Systems is committed to providing forward-thinking Hospitals, Behavioral Healthcare Providers, and Integrated Health Networks with innovative software solutions and services that enable them to better manage their revenue cycle and to deliver the most exceptional service to their own customers.
