YALE ADDS PORPHYRY TARGET TO THE LA VERDE PROJECT

Yale Resources Ltd. (TSX-V - YLL and Frankfurt - YAB) is pleased to report that it has acquired, by staking, an additional 440 hectares of prospective ground adjoining the northeast corner of the La Verde Project. This addition to the La Verde Project covers a large porphyry target with anomalous copper, zinc and molybdenum values.

In 2000, Freeport McMoran drilled 8 RC/diamond drill holes over a six square kilometre area. This drilling loosely defined the La Sierrita quartz monzonite porphyry underlying an area four square kilometres in size. Each hole drilled into the La Sierrita Porphyry encountered copper, zinc, tungsten, and molybdenum mineralization over considerable widths.

“The presence of the La Sierrita Porphyry is significant to Yale as it demonstrates that there is a very large mineralizing system within the La Verde Project”, stated Ian Foreman, P.Ge., President of Yale Resources.

The association between the La Sierrita Porphyry and the copper-zinc-silver-gold skarn deposits (the La Verde Grande Mine, as well as the La Verdesita, San Louis, El Picacho, La Tescalama and La Verde deposits) identified to date within the La Verde property is unknown at this time.

About the La Verde Project:

The La Verde Project covers 2,640 hectares (26.4 square kilometres) and is located 45 km northwest of Hermosillo, Sonora State, Mexico. In addition to the historic La Verde Grande copper-zinc-silver-gold mine, the La Verde Project contains at least five other known deposits that have all seen limited production. The La Verde Grande copper-zinc-silver-gold mine is a skarn deposit with a pre NI 43-101 historic resource of 459,551 tonnes grading 2.29 % copper, 98.54 g/t silver and 0.38 g/t gold. In addition to the possible extensions to the La Verde Grande mine, the La Verde Project has considerable exploration potential.

Ian Foreman, P.Ge., is the Qualified Person, according to National Instrument 43-101, for the La Verde Project and is responsible for the technical data mentioned in this news release. All ‘Historic Data’ is presented for reference only and should not be relied upon as it pre-dates NI 43-101.

On behalf of the Board,

“*Ian Foreman*”

Ian Foreman, P.Ge.
President
